

# HYDROSPHERE

CLOUD DATA HOSTING SERVICE FOR TELEMETERED SOLUTIONS

## Data Anytime, Anywhere

Hydrosphere is a scalable, collaborative data visualization platform for outdoor water monitoring. Empower your organization and all data stakeholders by:

## HydroSphere

Telling you data's story with customizable graphs, tables and dashboards

Never missing an event with data-driven alarms and customizable escalation

Defining roles and access to your data with personalized credentials for each user

Building networks of monitoring sites

Creating public websites for visualization of curated data.

# HydroSphere

## Configure Data Dashboard

Make your data tell an instant story with a custom, configurable data dashboard.

## Alarms/Escalation Path

Create alarms so you never miss an event, and with alarm escalation paths, you can notify others if you're not available to react.

## Secure data storage and web hosting

Rest assured with 24/7 monitoring—utilizing machine learning for data classification and protection.

## Export customized reports

HydroSphere allows you to create and manage custom reports that you can share with anyone; present your data how you want it to be seen.

## Backfill data when transmission is interrupted

Operating on a High Availability platform, HydroSphere will always be there with your data, with a 99.9+% availability rating.

## View anytime/anywhere

HydroSphere's cloud based design allows access to your data from any web-enabled device; log in anytime, anywhere.
