IQ SensorNet
CONTINUOUS PROCESS MONITORING & CONTROL
YSI is your trusted partner for your municipal instrumentation and monitoring needs.

For 70 years, YSI has manufactured and designed sensors, instruments and solutions for water quality monitoring. We offer a full range of water quality instrumentation designed for monitoring and testing municipal water. They are field-tough, lab-smart, and applicable throughout your wastewater facility. From the lab to spot sampling to continuous monitoring and control, YSI’s instruments can help you throughout your process, from influent to receiving waters.

YSI instruments are backed by our technical team with years of experience, and who are committed to helping our customers improve their process.

Today, the Yellow Springs, Ohio manufacturing facility employs over 200 people who are dedicated to designing and building reliable water quality instrumentation that meets the needs of our municipal customers. And now more than ever, municipalities demand a partner with the added ability to improve their operational efficiency by providing innovative solutions for continuous monitoring and process control.

The YSI IQ SensorNet product line is the best solution for the wastewater industry... from small to large facilities. The network-based system is all about ease, scalability and performance. Our instruments can help you with process optimization, increased efficiency, lower energy use and compliance reporting. Monitor influent, reduce energy use during the aeration process, monitor effluent or control any part of the process such as biological nutrient removal, phosphorus removal or returned activated sludge lines. Whatever your application needs are, we are here to support your good work with our extensive network of experts all over USA.

Thank you for your interest in YSI. We look forward to partnering with you.

System-wide Process Monitoring & Control

**Influent:**
- pH
- Conductivity
- Ammonium
- COD
- TOC
- BOD
- SAC

**Aeration:**
- Dissolved Oxygen
- BOD
- ORP
- Ammonium
- Nitrate
- Nitrite
- NOx
- TSS
- pH
- Orthophosphate

**IQ 2020 Controller**
Can be docked in the control room or at any point along the system network.

**Control Room**
**Disinfection / Effluent:**
Ammonium, Nitrate, Nitrite, UVT-254, Orthophosphate, pH, Conductivity, Dissolved Oxygen, Turbidity, ORP, COD, TOC, DOC, BOD, SAC

**Final Settling:**
Turbidity, TSS, Sludge Level

**Portable Display Units**
Additional controllers can be docked anywhere in the system.
IQ SensorNet
2020 3G Controller

System 2020 3G Features

Display up to 20 parameters plus temperature, in any combination
Expandable network
Centralized power supply along entire network
LED status lights for quick visualization of system functionality
Numerous relays and analog outputs may be selected
Change or move sensors at any time with ease
Integrates into existing PLC and SCADA systems
Communications via modem, radio transmission, PROFIBUS, MODBUS RTU, MODBUS TCP/IP, Ethernet IP
Digital Color Display

Parameters

- Ammonium
- BOD*, COD*, DOC*, SAC*, TOC*
- Chloride
- Conductivity
- Dissolved oxygen (optical or electrochemical)
- Nitrate
- Nitrite*
- NOx*
- ORP
- Orthophosphate
- pH
- Potassium
- Salinity
- Sludge level
- Specific conductance
- Temperature
- TSS*
- Turbidity*
- UVT-254* (*ultrasonic cleaning for sensors)

2020 3G Terminal Controller Specifications

**Benefits of IQ SensorNet**

- One cable for power and communications; simplifies installation
- UltraClean® ultrasonic cleaning; prevents fouling
- USB interface
- 3-year instrument warranty; factory-calibrated DO cap with 2-year warranty
- System redundancy for backup control and power
- DC optional back up power
- Modular expansion - add sensors and communication outputs at any time (1 to 20 parameters per network)
- Easily stack modules without extra wiring
- System-wide lightning protection

---

**Improve operational efficiency with continuous data.**

With a scalable solution, the 2020 3G allows for the measurement of up to 20 parameters. Add sensors at any time and at any location or exchange them with ease. This completely modular plug-and-play system allows you to monitor and control the process in your wastewater facility continuously and accurately.
System 282/284 Features

Connect 1-4 digital sensors for a variety of parameters

One cable for power and communications

UltraClean® ultrasonic cleaning

Numerous relays and analog outputs may be selected

Lightning Protection

3-year instrument warranty

USB interface and data logging capabilities

Easy-to-read digital color display

Communications via modem, radio transmission, PROFIBUS, MODBUS RTU, MODBUS TCP/IP, Ethernet IP

The IQ SensorNet 282 and 284 controllers can connect to 1 - 4 sensors, allowing up to 20 parameters to be measured. The network can easily be expanded with additional measuring locations and communication outputs. The 282 and 284 are compatible with all IQ SensorNet sensors including reliable Ion Selective Electrodes, a wide range of UV VIS spectral sensors, wet chemistry analyzers, accurate dissolved oxygen and more.
IQ SensorNet Modules

IQ SensorNet modules provide a variety of functions for power, communications, outputs and controllers, in order to improve your system’s efficiency. All modules can be installed anywhere in the system, either individually or in stacks.

Up to three modules can be connected to form a stack.

**Module Options**

| Controller Modules with communications | 2020 3G (up to 20 parameters plus temperature) | 284 (up to 4 sensors)  
282 (up to 2 sensors) (up to 20 parameters, depending on sensor) |
|----------------------------------------|-----------------------------------------------|-------------------------------------------------------|
| Microcontroller (MIQ/MC3), Profinet (MIQ/MC3-PR), Modbus (MIQ/MC3-MOD) All include Ethernet IP and Modbus TCP/IP. Microcontroller can be used as main or backup controller. | 110-240 VAC, 18 Watt (MIQ/PS)  
24 VAC or 24 VDC (can be used as main or back-up) (MIQ/24V) | Select power supply and outputs when ordering 282/284. Here are some options. Many more available!  
- 1-2 sensors, 3 outputs, 3 relays. 110-240 VAC (DIQ/S 282-CR3)  
- 24 VAC or 24 VDC option (DIQ/S 282-CR3/24V)  
- 1-4 sensors, 6 outputs, 6 relays. 110-240 VAC (DIQ/S 284-CR6)  
- 24 VAC or 240 VDC option (DIQ/S 284-CR6/24V)  
- (3) relay and (3) current outputs (DIQ/S 282-CR3)  
- (6) current outputs (DIQ/S 284-CR6)  
- (6) relays (DIQ/S 284-CR6)  
- Profibus communication (DIQ/S 282-PR or DIQ/S 284-PR)  
- Modbus communication (DIQ/S 282-MOD or DIQ/S 284-MOD) |
| Power Supply Modules | (3) relay and (3) current outputs (MIQ/CR3)  
(6) current outputs (MIQ/C6)  
(6) relays (MIQ/R6) | |
| Analog Output Modules | Profibus DPV1 with FDT/DTM communication (MIQ/3-PR)  
Modbus Communication (MIQ/3-MOD) | |
| Interface Modules | |

*Choose pH or ORP for the SensoLyt

** The VARiON can measure either potassium or chloride, but not both.
IQ SensorNet Sensors
VisoTurb & ViSolid

All IQ SensorNet sensors are rugged, reliable digital sensors designed specifically for wastewater applications. Our sensors are detachable from the cable and can easily be switched out or moved. Just unscrew, move, and re-install.

**VisoTurb - Turbidity**

- Multi-point factory calibration; no need to recalibrate; matrix adjustment is possible
- Ultrasonic cleaning with UltraClean™ technology prevents fouling and lowers maintenance
- Nephelometric measurement technology
- Sample discoloration does not affect measurements
- 2-year sensor warranty

**VisoTurb & ViSolid Sensor Specifications**

### IQ SensorNet Sensors

**VARiON, AmmoLyt & NitraLyt**

#### Ion Selective Electrode (ISE) Sensors

**VARiON** - Ammonium and Nitrate, Potassium or Chloride
- Single- or dual-measurement of ammonium and nitrate; compensation for potassium or chloride
- Factory calibrated & stable slope
- Compensation electrode; prevents interferences and improves accuracy
- Stable reference system holds calibration providing reliable measurements and extended electrode life
- 2-year sensor warranty; 1-year electrode warranty; 18-month typical working life

**AmmoLyt** - Ammonium, Potassium

**NitraLyt** - Nitrate, Chloride
- Ammonium or nitrate measurement with continuous potassium or chloride compensation
- Factory calibrated & stable slope
- Compensation electrode; prevents interferences and improves accuracy
- Stable reference system holds calibration providing reliable measurements and extended electrode life
- 2-year sensor warranty; 1-year electrode warranty; 18-month typical working life

IQ SensorNet Sensors
UV & UV/VIS

IQ SensorNet UV and UV/VIS sensors are optical-based, reagentless spectrophotometers built into rugged, corrosion-resistant probes that are designed to measure accurately in harsh applications. Single and broad spectrum options available. The spectral sensors scan 256 wavelengths per measurement for increased accuracy and single wavelength sensors with turbidity compensation are available for NOx and UVT-254 (SAC) measurements. All UV/UV-VIS sensors utilize UltraClean™ ultrasonic technology to prevent fouling and lower maintenance requirements.

All sensors:

• Ultrasonic cleaning with UltraClean™ technology prevents fouling and lowers maintenance requirements
• Built-in airholes for added air cleaning in high fouling applications
• No reagents required resulting in reduced operational costs and less impact on the environment
• Durable, long-lasting materials - titanium and PEEK will hold up in the toughest conditions
• Immediate detection of organic loads without reagents
• 2-year sensor warranty
• IP68

Spectral Sensors -
NitraVis (TSS), CarboVis (TSS), NiCaVis (TSS), NitraVis NI, NiCaVis NI

• UV and UV/VIS sensors with 256 wavelength scan
• Scanning 256 wavelengths results in higher accuracy and better compensation for interferences
• Factory calibrated per location in the process (influent, aeration, effluent)
• User calibration possible for improved accuracy
• Ability to differentiate between Nitrate and Nitrite concentrations (on NI sensors only)
• Display up to five parameters depending on the application
• Calculated parameters: COD, TOC, BOD, Nitrate, Nitrite, TSS (depending on sensor)

Single Wavelength - UVT-254, NOx

• Turbidity compensation
• Regulate and control UV disinfection with UVT-254
• Correlated parameters: COD, TOC, BOD, DOC from UVT-254 (SAC) measurement
• Monitor nitrification/denitrification process with NOx
Online monitoring of the nitrate concentration at critical locations provides the information needed to achieve the three objectives for a denitrification control system:

1. Meet discharge limits for nitrogen
2. Maximize use of wastewater COD
3. Minimize the addition of external carbon
Alyza IQ analyzers are the reliable, low-maintenance solution for wastewater monitoring and control. Easy to maintain, the Alyza PO4 and NH4 instruments are cabinet-style, wet chemistry analyzers with built-in sample delivery systems. Available in single- or dual-channel versions, featuring self-cleaning and calibration for dependable measurements, Alyza uses very little reagents, lowering your cost per measurement.

Alyza IQ Features

Parameters:
- Ammonium or Orthophosphate - instrument dependent
- Extremely low reagent consumption - 5 µL (PO4) or 15 µL (NH4) per measurement
- Connects to IQ SensorNet controllers 2020 and 282/284 (provides 10W power)
- Easy installation - analyzers can be installed directly at the basin
- 1- or 2-channel versions; 2-channel allows for sampling from two locations
- Simple service - reagent bag design makes replacing reagents easier and safer than ever
- Optimized user interface and self-diagnostics
- 1- or 2-point automatic calibration at user-defined intervals
- High accuracy at low measuring ranges
- Minimum maintenance with automatic cleaning

Filter Membrane Module
- With premounted membrane

Long-life Reagent
- Long-lasting no-drip replacement pouches are easier and safer to replace.

Networking & Integration

Alyza IQ is fully integrated into the IQ SensorNet as a sensor. The new analyzer connects to IQ SensorNet 2020 or 282/284 controllers.
IQ SensorNet Sensors

IFL Sludge Level Sensors

The IQ SensorNet IFL is an ultrasonic interface level sensor. During the wastewater treatment process, the measurement of the interface level (sludge level) between liquids is important for process control. The IQ IFL 700 provides continuous sludge level data to assist with operational efficiency improvement decisions.

IFL 700 - Sludge Level Sensor

- Smart signal filters out interferences like sludge rakes for reliable sludge level measurements all the time
- Non-contact, maintenance-free automatic wiper option available
- Factory calibrated
The modular YSI IQ SensorNet water quality monitoring and control system is a complete sensor network for a variety of application needs. This powerful system lets you easily add more modules or sensors at any time for continuously measuring water quality anywhere in your facility for complete process control. In addition, you also receive these exclusive benefits, as provided only by YSI.

Benefits of IQ SensorNet

- UltraClean™ ultrasonic cleaning integrated into turbidity, TSS, UV and UV-VIS sensors
- One cable for power and communication - send measurement data back to control room via IQ SensorNet cable - no need for multiple cable drops and conduit runs.
- 2020 3G controller display connects to any module or network
- 3-year warranty - controllers and modules
- 2-year warranty - sensors
- Controller, modules, and sensors can be placed anywhere in the network - flexible configuration
- Measure up to 20 parameters per network
- Expand network easily without additional engineering and design work
- Smart technology recognizes and displays sensors
- Network outputs analog and digital communication signals
- Universal sensor cable with detachable sensors
- USB electronic key function ‘locks’ and saves system settings from accidental changes
- No calibration required on most sensors; automatic drift compensation
- Measures DO, conductivity, temperature, pH, ORP (Redox), nitrate, nitrite, NOx, soluble and total for COD and SAC, UVT-254, orthophosphate, sludge level, ammonium, potassium, turbidity, TSS, BOD, DOC, TOC, chloride
- Optical DO sensor is immune to bubble interference with unique angled design
- Back-up controller function and backup power provides system redundancy

Mounting Options & Air Cleaning

• **Rail Mount**
  Controller and modules with rail mounts, shown with sun shield.

• **Handrail Mount**
  Sensor immersion handrail mount and controller handrail mount with sun shield

• **SensoClean Swing Mount**
  Swing mount shown with rail mounting stand; also available with floor and wall mounting stands

• **SensoClean Swing Mount**
  Shown with single sensor holder

• **Dual Sensor Holder**

• **Triple Sensor Holder**
IQ SensorNet offers a variety of mounting options to suit individual installation needs. Additional mounting options are available for controllers, modules and sensors, including panel and wall mounting, DIN rail mounting, horizontal chain mounts, vertical rail mounts and more. Our experts can help you select the right mounting hardware for your facility.

- **Insertion Mount**
  - Pressurized and retractable;
  - 2 bar or 10 bar overpressure

- **In-pipe Mount**
  - For 2-inch PVC; available with and without cleaning connections

- **Float Mount**
  - Available as a single, or dual sensor mount

---

**Air Cleaning**

Optional air cleaning.
One, two and four channel cleaning air boxes available

- Air cleaning sensor head

1) The tissue in plants that brings water upward from the roots;
2) a leading global water technology company.

We’re a global team unified in a common purpose: creating advanced technology solutions to the world’s water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services settings. Xylem also provides a leading portfolio of smart metering, network technologies and advanced analytics solutions for water, electric and gas utilities. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.
