YSI IQ SensorNet FDO H®
Optical Dissolved Oxygen Sensor, certified for Hazardous locations (Class 1, Div. 2) according to NFPA 820

The FDO H is an optical, luminescent based DO sensor for the IQ SensorNet system that has been certified for use in Class 1, Division 2 hazardous locations according to NFPA 820.

The FDO’s optical-based sensor provides continuous and precise dissolved oxygen measurements without regular maintenance requirements allowing for effective aeration control. This helps improve plant efficiency while lowering energy costs.

- **Intelligent Sensor Cap**
  The sensor cap is individually factory calibrated. Calibration data is stored on a chip that is embedded in the sensor cap. No need to enter calibration coefficients. When a new cap is installed, the coefficients are recognized and sent directly to the controller terminal eliminating the need to manually enter information.

- **Equal Path Reference System**
  The optical measurement and reference paths are identically designed. This allows for identical aging of the components which enables accurate compensation and eliminates calibrations. That’s correct, there is no calibration required.

- **Green Light Technology**
  Softer, low-intensity excitation light increases the lifetime of the cap. This translates into a two year warranty on the standard cap.

- **2-year Warranty**

### IQ SensorNet FDO H Ordering Information

(order 2020 XT terminal, modules, cables, sensors separately)

- **FDO 700 IQ H (#207 065Y)** Optical DO sensor for monitoring and control in Class 1 Div. 2 locations; includes 1 factory calibrated sensor cap
- **FDO 701 IQ H (#207 066Y)** Optical DO sensor for monitoring and control in Class 1 Div 2 locations; faster response time; includes 1 factory calibrated cap
- **SC-FDO 700 (#201 654Y)** Replacement; universal factory calibrated sensor cap for FDO 700 IQ H, FDO 700 IQ and FDO 700 IQ SW
- **SC-FDO 701 (#201 655Y)** Replacement; fast response factory calibrated sensor cap for FDO 701 IQ H FDO 701 IQ and FDO 701 IQ SW
- **MIQ/BB1 (#207 001Y)** Barrier box for connecting FDO H 700/1 to an IQ SensorNet - Class 1 Div 2, Groups A,B,C,D, Zone 2 Group IIC

The Barrier Box (MIQ/BB1) must be used for connection of the FDO H. Refer to the following documents for proper installation:
- Control drawing, YSI document no. 28123 (see MIQ/BB1 operating manual)
- MIQ/BB1 operating manual
- All applicable electrical code regulations
