# Kor Software

VERSION 1.3.5.0

Kor Software is an accessible, feature-rich platform for managing YSI instrumentation and water quality data. Easily calibrate sensors, setup long-term deployments, and ensure equipment is operating at peak performance.

Compatible Instruments:
Kor Software replaces both KorEXO and KorDSS as the primary user interface for managing EXO and Pro Series instruments and data.

- EXO Sondes
- EXO Handheld
- ProSwap Logger
- ProDSS Handheld
- ProSwap Handheld
- ProSolo Handheld

Kor Software – v1.3.5.0
November 2023

What's New:
Bug fixes and added export functionality.

Change Notes:
- Bug fixes for database imports
- Bug fixes for handheld downloads
- Improvements to Modbus enable/disable interface for ProSwap Logger
- Added export function for Pro Series instrument configuration
- Added print and export function for EXO NitraLED site correction and calibration
- User Interface corrections
