KorEXO Firmware Update

DOWNLOAD AND APPLY THE LATEST FIRMWARE

Visit the YSI **Software and Firmware Downloads** page: https://www.ysi.com/customer-support/software-firmware-downloads/software

Under **Firmware**, click the button to download the latest KorEXO Firmware Update Package.

Software Downloads You'll find all software download links on this page.	
Software	Firmware
Software DD MM YYYY	KorEXO Firmware Update Package - vX.X.X DD MM YYYY
	If you've experienced problems with automatically downloading the latest firmware versions for your EXO equipment using Kor Software, you can attempt a manual update using this firmware package. This will update the EXO Sond to version X.X.X.
Download [11.5 MB]	Download KorEXO Firmware [8.3 MB]

Locate the download file (typically in the **Downloads** folder on your computer) which is zipped.

Right Click on the folder and select **Extract All**. This will unzip the files into a folder named **korexo-firmware-[Version]**

Double-click to open the firmware folder. Inside, there will be another .zip file along with the KorEXO Manifest file. Leave this folder as-is with those two files inside. When you browse for a local update package (Step 5), you will point to this folder.

Launch KorEXO Software and click on the **File** menu.

Select the **Click Here to Browse for a Local Update Package** button.

	CLICK HERE TO DOWNLOAD AN UPDATE, IF AVAILABLE					
	CLICK HERE TO BROWSE FOR A LOCAL UPDATE					

NOTE: If you do not see this button, perform the following steps:

- Click on Settings and toggle the setting for Automatically Update Software and Firmware to Off.
- Click **Save** and close KorEXO Software.

- Open KorEXO Software again and click on the **File** menu.
- There should now be a **Click Here to Browse for a Local Update Package** button.

5

When browsing for a local update package, select the folder that you extracted earlier and those files will be imported into the software. When it is done, an **Update is Available** message will appear.

Close and restart KorEXO Software and the firmware update will be applied.
